## Professional Summary

Technical founder operating at the intersection of AI and commerce. Co-Founder & CTO of AirShelf (Antler-backed, Singapore), which turns equipment sellers' product knowledge and sales rules into sourced answers and offers that buyers and their AI agents can act on. Previously Co-Founder & CTO of 12Go — APAC's leading ground transportation OTA, scaled to **50,000 bookings daily**, **45-person team**, and **$500K daily GMV** over a decade.

## Notable Achievements

- **Co-founded AirShelf** — Antler-backed, selected for **HP Garage 2.0** and **NVIDIA Inception**. Took **Toshiba Australia** from a paid pilot to a signed annual contract within 10 months of forming the company.
- **Scaled 12Go** from startup to APAC's leading ground transportation OTA: **45-person remote team** across 12 departments, **$500K daily GMV**, **99.95% uptime**.
- **Navigated COVID-19** via operational pivots; led due diligence for the acquisition of 12Go by Bookaway (now Travelier) and the integration across **4 international markets**.

## Professional Experience

**Co-Founder & CTO** **Sep 2025–Present**

**AirShelf | Seller Agents for Agentic Commerce (Singapore)** *Antler SG19; pre-seed funded*

- Built and shipped the product hands-on: a seller agent that answers buyers and their AI agents from **sourced product facts** and qualifies each request. Live on **Toshiba Australia** product pages; quoting with rep approval is in proof of concept with a design partner.
- Launched the self-serve **AirShelf Agentic Storefront** (Oct 2026). From a website or one PDF catalogue, a seller gets a sourced product page, a sales assistant for their own site and a catalog other AI agents can query, on a monthly plan after a free trial. Read **68 of 68** real exhibitor catalogues for the HKTDC Hong Kong fairs; proposed to HP.com for its SMB programme.
- Opened seller catalogs to AI agents over open protocols (MCP, ACP, UCP) with answers that cite their sources. Contributor to UCP's price-on-request and quote design; member of the **AAIF Agentic Commerce working group** (Linux Foundation). Engineered a **fail-closed private inference mode** on open-weight models, so customer data never reaches frontier model APIs.
- Also designed and shipped: merchant dashboard, semantic shopping API (**175+ stores / 22 markets**), AI-search visibility benchmarking across major assistants, hallucination detection, golden-record extraction pipeline.
- **First paying enterprise customer**: Toshiba Australia, from paid pilot (Apr 2026) to signed annual contract (Jul 2026). Selected for **HP Garage 2.0** and **NVIDIA Inception**.

**Co-Founder & Chief Technical Officer** **2014–2025**

**12Go.com | Ground Transportation OTA (Online Travel)** *Senior dev 2014; co-founder & CTO 2015*

- Scaled platform to **50,000 tickets sold daily**, **100+ searches/sec**, **<150ms search latency**, **99.95% uptime**, global coverage.
- Built and led a **45-person remote team** across 12 departments spanning Eastern Europe, Southeast Asia, and the Middle East — agile workflows, CI/CD, ICE-prioritized roadmap, A/B-tested product decisions.
- Architected the stack end-to-end: search API + sharded caches + pricing engine over **150+ supplier integrations**, web app (Vue.js, Nuxt) and a mobile app delivering **30% of bookings** in year one, all on AWS (EC2, RDS, S3, CloudFront) with Grafana/Datadog/Clickhouse observability.
- Navigated COVID-19 via operational pivots; led due diligence for the acquisition by Bookaway (now Travelier). My team then unified inventory, BI and finance reporting across **Israel, Croatia, Argentina, and Brazil**.

**Co-Founder & CTO** **2011–2012**

**GV | Holiday Rentals Platform (Online Travel)** — Co-founded one of Southeast Asia's first holiday rental platforms; partnered with Airbnb during their Thailand expansion. Stack: PHP, MySQL, Go.

## Skills & Expertise

- **AI & LLM Integration**: Production systems across all major LLM providers (Anthropic, OpenAI, Google, Perplexity). Private GPU inference with open-weight models. Semantic search, structured extraction, hallucination detection, agent commerce protocols (ACP, UCP, MCP).
- **Full-Stack**: TypeScript, Next.js, React, Node.js, PostgreSQL, Prisma, Redis, Vercel.
- **System Architecture**: Designing low-latency, high-availability systems. Edge proxies, API design, caching, real-time pipelines.
- **Cloud & Infrastructure**: AWS (EC2, RDS, S3, CloudFront), Vercel, Neon (serverless Postgres), Docker, K3s. Monitoring: Grafana, Datadog, Axiom.
- **Leadership**: Built and managed 45-person remote team across 12 departments. Hiring, mentoring, retention. Agile, CI/CD, data-driven prioritization.
- **Founder Skills**: Fundraising (Antler pre-seed), enterprise sales, pilot delivery, investor relations, M&A due diligence.

## Education

**Specialist degree in Applied Mathematics** (MSc-equivalent, 5-year programme)
Moscow Aviation Institute (National Research University) 2005–2010

## Additional Information

**Languages:** Russian (native), English (fluent), Thai (conversational)
**Location:** Singapore (previously Bangkok, 10+ years)
